2.	Product List	Page 33
3.	Lists of Free Condoms Venues (by SIMD Quintile & Intermediate Zone)	Section 2 Pages 1-14

## 1. Introduction and Background

This Annual Report outlines the work undertaken by NHSGGC Free Condoms Service during the period January 2013<sup>4</sup> to December 2015, which is the third complete year of service. 'Free Condoms' was launched in 2010 following the evaluation of the C-Card Model of distribution. The Free Condoms service began with 113 sites inherited from the previous 'C-Card' service. The current model of distribution is based on the recommendations from the review concluding in February 2010, and is subject to ongoing review to ensure it is meeting its aims and objectives and adheres to the governance framework within which it is continuously monitored. This includes ensuring that NHSGGC Free Condoms is underpinned by policy, which is outlined below.

The Scottish Sexual Health Strategy<sup>1</sup> recommends that all health boards should make a range of condoms freely available across a range of agencies and locations to prevent HIV, Sexually Transmitted Infections (STI's), and unintended pregnancy.

The Sexual Health and Blood Borne Virus Framework<sup>2</sup> recommends that multi-agency partners should be working together to ensure services, including the provision of general sexual health advice, pregnancy testing and condoms, are available in areas of greatest need.

The HIV Action Plan in Scotland<sup>3</sup> sets out a range of standards to ensure that health boards effectively target condom resources to reflect population with the highest prevalence of HIV.

## **2. Aims and Objectives**

The aims and objectives of the Free Condoms Service were defined in November 2010 prior to the development and launch of the service. A full copy of the Aims and Objectives Paper can be found at Appendix 1. These were reviewed in January 2013 as part of continued service development and will be reviewed during 2015. The over-arching aim of the Free Condoms service is to provide free condoms across NHS Greater Glasgow and Clyde (NHS GGC) to people who need them.

The seven primary aims of the service are:

- To identify appropriate target groups based on identified need.
- Monitor and review performance of delivery of the service in order to create and maintain effective partnerships which enable service development and delivery.
- To provide an available and accessible quality service.
- To establish and maintain effective communication with current and future service users.
- To provide a responsive service that addresses the needs of service users.
- To contribute towards the evidence base and inform future policy and services.
- To ensure appropriate accountability and governance.

### **3. Operational Service Provision**

#### **3.1 Condom Supply**

The tender for the supply of condoms and lubricants was first processed in autumn 2010. This 18 month contract was awarded to Pasante Healthcare Ltd to run from December 2010 – May 2012 and was then extended to March 2013 with the potential for the contract to be extended on a year by year basis for a further 4 years. The contract for Pasante was further extended for 2013-2014, and is in process to extend the contract for 2015-2016. Condoms are packaged by Pasante into discreet plain packaging clearly marked with a label coding the contents and use-by date. Pasante couriers continue to deliver condoms directly to each distribution venue.

#### **3.2 Product Range**

Efforts continue to ensure that the product range reflects the needs of target groups and is in line with current evidence regarding condom effectiveness. The list of products currently offered to distributors/service users is attached as Appendix 2. There are 12 condoms in each pack with the exception of the STN x 3 pack which contains 3 condoms. Lubricant packs contain 12 x 10ml sachets. This range is available to all our venues (free condoms venues), and our partner agencies are supplied by these with the addition of some other products based on the needs of their service users. Clinic boxes (144 condoms) and eco packs of standard condoms (288 condoms) are also supplied to agencies such as addiction services.

#### **3.3 Provision for Service Users**

The current condom distribution service, branded as 'Free Condoms', is designed to be a user friendly service for both the service user and for those involved in distributing condom products.

The main features of 'Free Condoms' for service users are:

- Condoms are accessible throughout the health board area.
- Condoms are accessible from a range of agencies.
- There is no requirement to register or provide personal details as a service user.
- 'Membership' cards are not required.
- There are no restrictions regarding the amount of times condoms can be accessed.
- The service is discreet and simple.
- Condoms are provided in discreet packaging.
- A range of products are available.

## 4. Distribution Venues

The main features of Free Condoms Venues are:

- The transaction involved in providing a condom pack is simple and discreet and therefore should not take up a great deal of staff time.
- There is no requirement to record transactions or complete paperwork.
- Condoms are ordered from the CDS team and are delivered directly to the venue.
- Delivery occurs within 10 days of ordering and condoms/lubricant are delivered pre-packaged into packs of 12.

### 4.1 Current Active Venues

There are currently 408 active Free Condoms venues. During 2014 there was limited recruitment of venues primarily due to mapping the venues against SIMD, Teenage Pregnancy and HIV Prevalence. Further details will be provided on this later in the report.

Table 1 shows the number of condom venues for the service from 2011 – 2014. Table 2 provides detail on the number of current distribution venues with their respective Community Health Partnership (CHP) locality.

The following provides context to the data tables :

- Table 1. There were 407 venues reported at the end of 2013
- 12 condom venues in North Lanarkshire (Muirhead, Stepps), and South Lanarkshire (Rutherglen, Cambuslang) were transferred to be managed and funded by NHS Lanarkshire Free Condoms Service.
- Graph 1 illustrates the total number of condom venues by business type. Pharmacies continue to be the main provider of the free condoms service (n=148)
- African Health Project, Brownlee Centre and Gay Men's Health<sup>4</sup> are coded separately on the Free Condoms database as these agencies provide condoms on a board wide basis to a key target group. Steve Retson Project is also coded separately on the Free Condoms database to differentiate from general Sandyford distribution and because it provides a broader range of product choice to a key target group. Therefore, all statistics shown regarding distribution venues does **not** include these 4 agencies.
- Table 3 provides detail on condom venues recruited during 2014.

---

<sup>4</sup> Gay Men's Health – Provision until 30<sup>th</sup> September 2014.

#### 4.2. Service Access Type

Distribution venues, depending on their business type, can be open service to the public (ALL access) or restrict to their own service users only (OWN access). Chart 1 shows the total number of venues for NHSGGC free condoms service split by access type. 273 venues are categorised as 'ALL' client access, and 135 venues are categorised as 'OWN' client access.

Chart 1. Free Condoms Venues – Split of Access Type

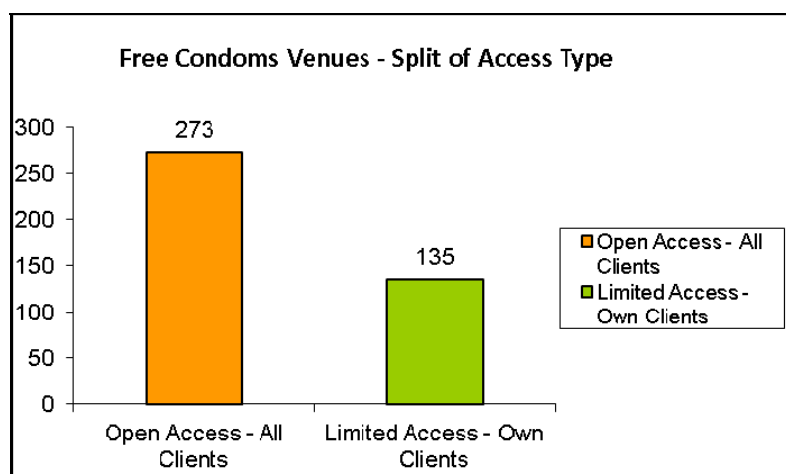

Table 4 provides context for access split per each CHP including the number of Intermediate Zones per locality.

Table 4. CHP/Sector Intermediate Zones and condom access type

<b>TOTAL</b>	<b>26736</b>	<b>23115</b>	<b>257399</b>	<b>377736</b>	<b>206118</b>	<b>58059</b>	<b>116979</b>	<b>4560</b>	<b>48104</b>	<b>1118806</b>

- The total number of condoms ordered (excluding partner agencies) is **1,118,806**.
- Sandyford Services ordered the highest number of condoms at 461,096 followed by pharmacy services (n = 296,534).
- Dr/Health Centres were third highest (n = 89.895).
- The commonwealth games are included here as a venue for North East, although this is 2014 only.
- South Lanarkshire is included but venues are now managed and funded by the Free Condoms Service NHS Lanarkshire.

Graph 2. Condom order volumes by business type (highest to lowest)

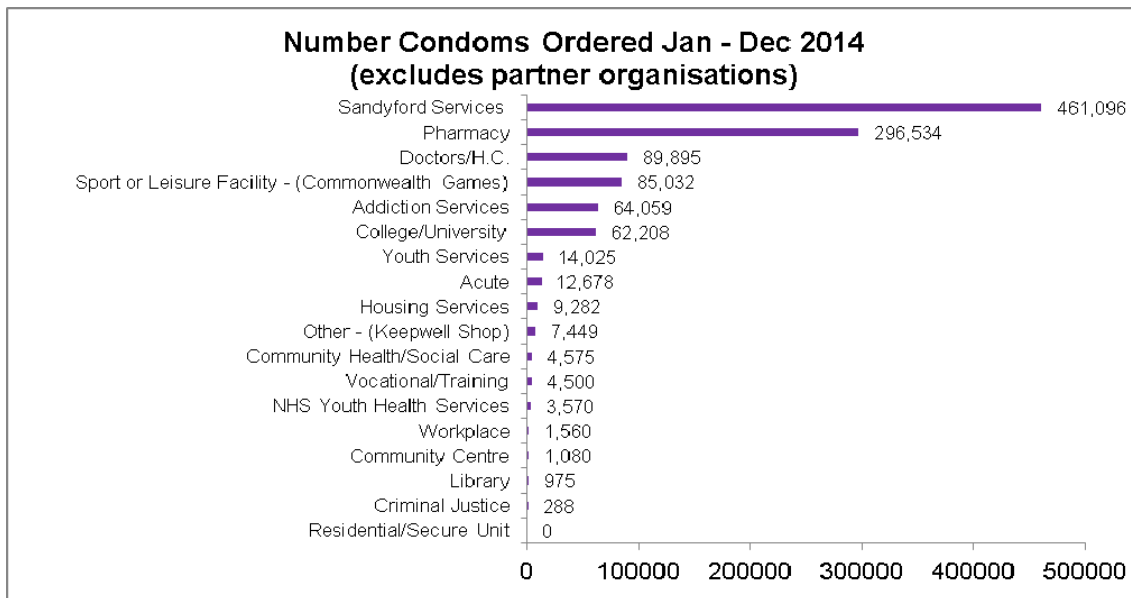

Chart 2: Condom order volumes by CHP/Sector

Note: Commonwealth Games (condoms n=85,032) is included in NE Glasogw Figures

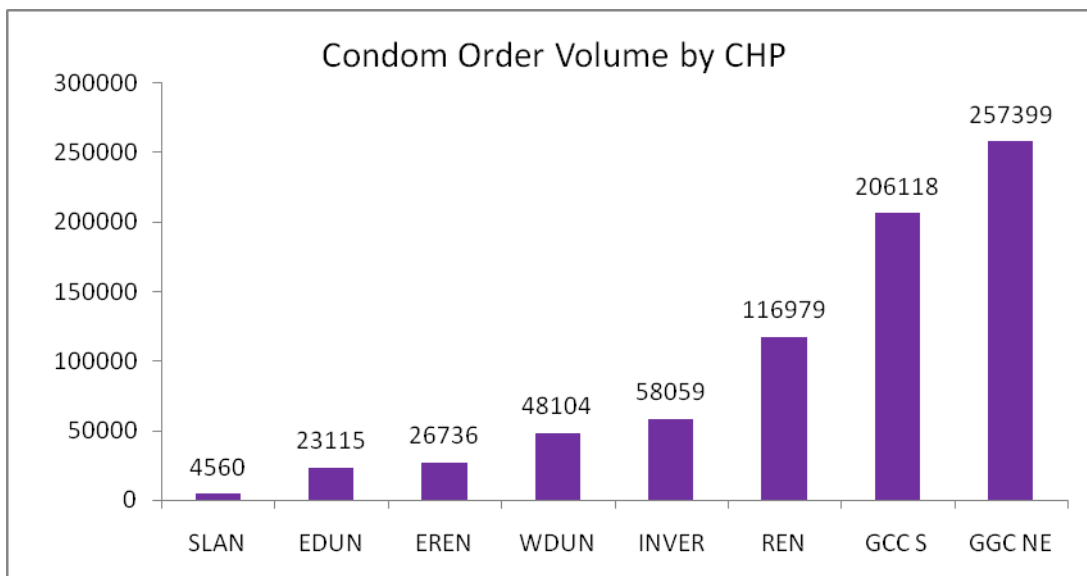

Table 6. All Condoms Ordered (2012 – 2014)

Service Area	Total Number of Condoms Ordered 2014	Total Number of Condoms Ordered 2013	Total Number of Condoms Ordered 2012
Steve Retson Project	4068	2400	4104
Brownlee Centre	38688	25200	33252
African Health Project	43212	28272	66576
Gay Men's Health	155664	288000	220,236
LGBT Commercial Venues	43632	NA	NA
Free Condoms Venues	1118806	1143609	1085490
<b>Grand Total</b>	<b>1404070</b>	<b>1487481</b>	<b>1409658</b>

Table 6 provides a total number of condoms ordered for Combined Free Condoms venues and partner agencies. As of 30<sup>th</sup> September 2014 following a HIV Prevention Needs Assessment of Men Who Have Sex with Men (MSM), Gay Men's Health (GMH) are no longer commissioned by NHSGGC. Their role included engaging with commercial venues and supply of condoms and lubricant from Free Condoms Service. Interim arrangements were put in place to provide venues with condoms and lubricant. These venues are categorised at LGBT Commercial Venues and condoms ordered are from 1<sup>st</sup> October 2014. The interim arrangements are under process review with the service redesign of the Steve Retson Project who will lead on the health improvement strand of MSM work. All condom volume reported for GMH and LGBT venues were provided to the same venues.

The total condoms ordered for NHSGGC Free Condoms fell from (n=1,487,481) in 2013, to (n=1,404,070) in 2014. The difference (n=83,331) calculates as 5.6% reduction between years. This figure for 2014 included condoms for the Commonwealth Games (n=83,808). When this figure isn't included the total is (n=1,320,262). On that basis the reduction in volume may be read as 11%.

Factors that may contribute to this are :

- Reduction in recruitment during the mapping exercise
- Move of venues (n=12) to North & South Lanarkshire

The mapping exercise also revealed approximately 33% venues that are classified as currently active are not ordering. Venues that serve a small population and should be retained are included here. Venues that do not serve a small population and who are not ordering will be a target for action particularly ALL client access venues in SIMD 1& SIMD 2 Quintile areas including pharmacies and Dr/Health Centre. In addition targeting venue recruitment in priority areas identified by the mapping exercise as not having a condom venue should ensure that by end of 2015 this should increase.

Table 7. Condom order by Sandyford Services

(Note: Camglen now part of NHS Lanarkshire)

### **Quality Improvement Actions 2015**

#### **Improve ordering**

- ❖ Engage with free condoms venues in SIMD1 & SIMD2 priority areas that are not ordering regularly to refresh and increase ordering and use of free condoms service, including addictions services and prisons.

## 6. Condoms Mapping Exercise 2014

During 2014 a mapping exercise of NHSGGC condom venue provision was undertaken to assess current service provision and future service delivery is based on evidence including data on the Scottish Index of Multiple Deprivation (SIMD)<sup>5</sup> including Income Deprivation, with Teenage Pregnancy Rates<sup>6</sup>, and HIV Prevalence. Consequently recruitment was kept at a minimum during 2014 in order not to contaminate the data set, and to ensure future targeted recruitment of venues following a gaps analysis exercise.

There are 254 Intermediate Zones in NHSGGC. The condom distribution database does not currently record venues by SIMD Quintile (2012) and Intermediate Zones. These fields will be added to the condom database and recorded when a condom venue is recruited. This report will provide further context of venues to include SIMD Quintiles and Intermediate Zones in each locality. List of venues including Intermediate Zone and SIMD Quintile is provided in Appendix 3..

- Table 8 provides context of venues against the number of Intermediate Zones in each locality.
- Chart 3 shows the distribution of Intermediate Zones – Glasgow City combined.
- Chart 4 shows the number of NHSGGC Free Condom Venues by SIMD Quintile. This has been updated since the mapping exercise that was completed in November 2014, and reflects current venue provision.
- Chart 5 displays the number of venues by SIMD Quintile for each CHP/Sector – a data table is provided for detail.

Table 8. Number of Intermediate Zones by CHP/Sector

CHP/Sector	Number of Intermediate Zones
East Dunbartonshire	28
Renfrewshire	38
NE Glasgow	39
South Glasgow	49
NW Glasgow	45
Inverclyde	17
East Renfrewshire	20
West Dunbartonshire	18
<b>Total</b>	<b>254</b>

<sup>5</sup> Scottish Index of Multiple Deprivation(2012). Income Deprivation Scores were used (Scottish Average

<sup>6</sup> Average Scottish Teenage Pregnancy Rate of 41.5 per 1,000 was used. Any Teenage Pregnancy Rates greater than 41.5 in an Intermediate Zone were highlighted against condom venue provision for that area. Data on Teenage Pregnancy Rates by Intermediate Zone was obtained via NHSGGC Business Intelligence – data years 2010-2012.

Chart 3. Distribution of Intermediate Zones by CHP (% is of total number (n=254) Intermediate Zones)

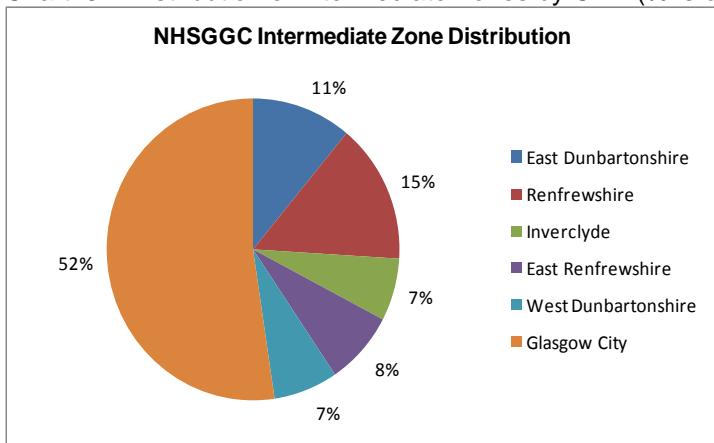

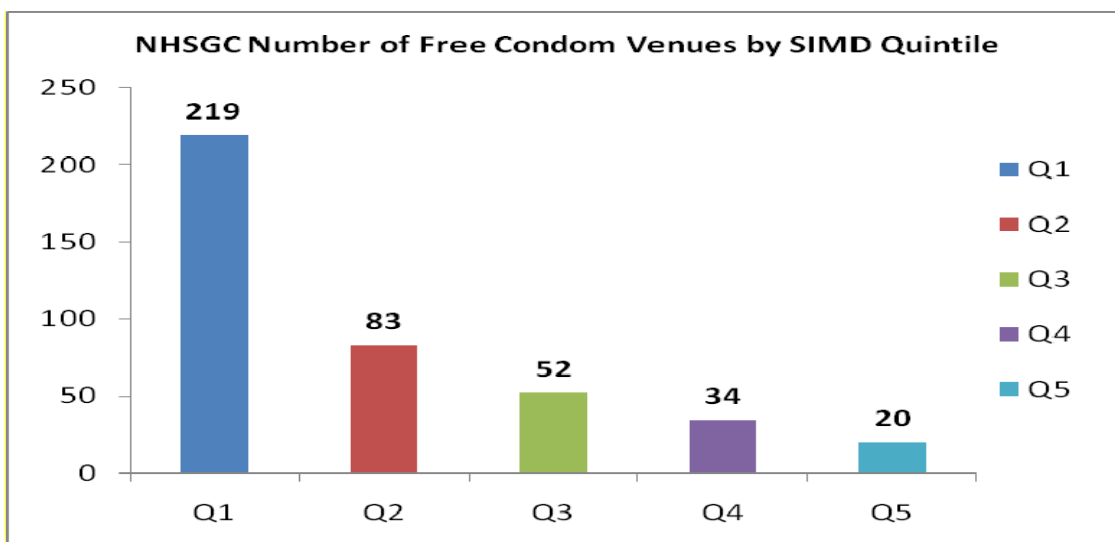

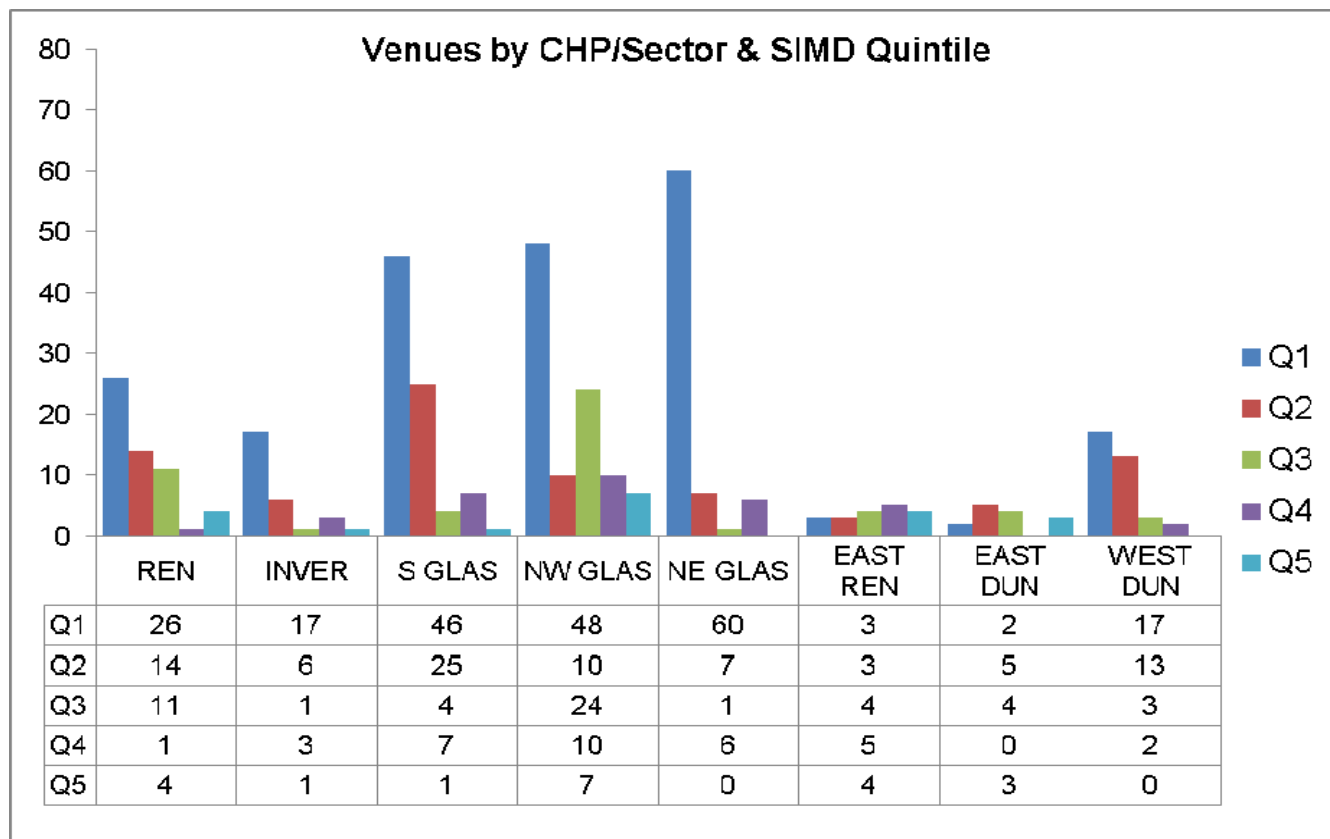

Chart 4: Overall Number of Free Condom Venues per SIMD Quintile

From the figures overall for condom venue provision by SIMD Quintile it appears that the majority of condom venues are in SIMD1 (most deprived) areas. The mapping exercise sought not only to plot where the venues are but to identify gaps in provision. This required creating data tables for each CHP showing Intermediate Zones with all relevant data populating fields. Postcode matching for venues meant that geographical maps could be created, but also provided a cross reference against the venues.

Chart 5. Number of Free Condoms Venues by CHP/Sector and SIMD Quintile

### **Quality Improvement Actions 2015**

#### **Data Collection and Reporting Mechanisms**

- ❖ Add fields for Intermediate Zones and SIMD Quintiles on condom distribution database for improved governance and reporting. This will allow the condom distribution database to be interrogated to provide information requests to include SIMD Quintiles matched to venue postcode.
- ❖ Database cleansing including review of definitions for access by clients

#### 6.1 Gaps in Free Condoms Service in context of Teenage Pregnancy

From the mapping exercise completed in November 2014 there were 141 Intermediate Zones in NHS GG (53%) identified as having a Teenage Pregnancy Rate higher than 41.5 per thousand (population 15-19 years). This is broken down by CHP/Sector in Table 9.

Table 9 . Number of Intermediate Zones with Teenage Pregnancy Rate > 41.5 per 1,000 (Scottish Average)

CHP/Sector	Number of Intermediate Zones	Number of Intermediate Zones in area where TP > 41.5 per 1,000
East Dunbartonshire	28	6
Renfrewshire	38	21
NE Glasgow	39	34
South Glasgow	49	34
NW Glasgow	45	26
Inverclyde	17	3
East Renfrewshire	20	2
West Dunbartonshire	18	15
<b>Total</b>	<b>254</b>	<b>141</b>

**Please note Table 10 does not identify all Intermediate Zones where Teenage Pregnancy Rate is higher than 41.5 per 1,000 – it identifies where it is higher + no ALL access/limited access only condom provision.**

Recruitment of venues, in particular 'ALL' access (e.g. pharmacies) is required in the following areas in the context of Teenage Pregnancy. .

Table 10. Gaps in Free Condom Service Teenage Pregnancy Rates by Intermediate Zone

CHP/Sector	Intermediate Zone	Condom Venues ALL access	Condom Venues OWN access
East Dunbartonshire	Harestanes	0	0
Renfrewshire	Johnstone South West	0	0

	Balloch North East/Gartocharn/Mill of Haldane (IZ Eighteen)	0	0
	Dumbarton East - Bowling/Barnhill/Crosslet (IZ Eleven)	0	0

## 6.2 Gaps in Free Condoms Service in context HIV Prevalence

**Please note Table 11 does not identify all Intermediate Zones where HIV Prevalence is  $\geq 2$  per 1,000 – it identifies where it is high + it identifies where it is high + no ALL access/limited access only condom provision.**

Recruitment of venues, in particular 'ALL' access (e.g. pharmacies) is required in the following areas in the context of HIV Prevalence.

Table 11. Gaps in Free Condom Service HIV Prevalence by Intermediate Zones

CHP/Sector	Intermediate Zone – NHS Greater Glasgow and Clyde	Condom Venues ALL access	Condom Venues OWN access
North West Glasgow	Knightswood Park East	0	0
	Knightswood Park West	0	0
	Maryhill East	0	0
	Woodside	0	0
	Drumchapel South	0	1
	North Kelvin	0	1
	<b>Wyndford</b> Recruitment in pharmacies required.	6	1
North East Glasgow	Petershill	1 (College)	2
	Dennistoun	0	0
	Springburn East and Cowlares	0	0
South Glasgow	Laurieston and Tradeston	1 (College)	11
	Ibrox East and Cessnock	0	2
West Dunbartonshire	Hardgate/Faifley (IZ Eight)	0	0

**Please note Table 12 does not identify all Intermediate Zones with high HIV Prevalence + high TP Rate + High Income Deprivation - it identifies these + no or limited condom provision.**

The mapping exercise showed gaps in condom provision in Intermediate Zones with High Teenage Pregnancy + High HIV Prevalence + High Income.

Table 12. Gaps in free condoms service  
HIV Prevalence + Teenage Pregnancy Rate + Income Deprivation.

CHP/Sector	Intermediate Zone	Condom Venues ALL access	Condom Venues OWN access
NW Glasgow	Knightswood Park East	0	0
	Knightswood Park West	0	0
	Maryhill East	0	0
	Drumchapel South	0	1
	<b>Wyndford</b> Recruitment in pharmacies required.	6	1

	Ibroy, East and Cessnock	0	2
West Dunbartonshire	Hardgate /Faifley (IZ Eight)	0	0

### **Quality Improvement Actions 2015**

#### **Venue Recruitment**

- ❖ Recruit venues in priority areas identified by mapping exercise to reduce inequalities, prevent HIV, STI's, and unintended pregnancy.

## 7. Free Condoms Web-site

The Free Condoms service website can be accessed at: <http://freecondomsglasgowandclyde.org>

A section of the 'Free Condoms' web-site is designed for use by professionals involved in condom distribution. The section is designed to give information to current service providers as well as providing information for potential new venues (who have the option of 'signing up' to the service by providing their details via an on-line form). Other topics in the practitioners section include information on products, service values and operation.

The web-site continues to be maintained and information is refreshed throughout the year. In 2014 a total of 17,771 visits were made to the website. Figures shown in Table 13 suggest a downward trend from 2012, although have picked up and increased from 2013-2014. Visits increased generally in the later part of the year, which may be due to the new academic year e.g. Fresher's events with promotions and seasonal promotions in November/December.

Table 13. Web Traffic

Month	2011	2012	2013	2014
January	0	2665	2352	1498
February	0	1681	1965	1368

November	1527	3241	1094	1576
December	1667	1543	1031	1503
<b>Total</b>	<b>12,708</b>	<b>21,442</b>	<b>17,389</b>	<b>17,771</b>

### 7.1 Devices

Analysis of devices used to access the Free Condoms Website (Table 14) reveal that desktop access has declined significantly from 84% in 2011 to 40% in 2014. This correlates with an increase in mobile and tablet devices (Apple I phones being the leader), with 60% of devices used being mobile and tablet.

Table 14. Devices Used to access Free Condoms Website

Device	2011	2012	2013	2014
Desktop	10657	14919	9558	7109
Mobile	2222	5700	6481	9105
Tablet	22	823	1350	1557
<b>Total Traffic</b>	<b>12,901</b>	<b>21,442</b>	<b>17,389</b>	<b>17,771</b>
% Desktop	82.6%	69.6%	55.0%	40%
% Mobile	17.2%	26.6%	37.2%	51.2%
% Tablet	0.2%	3.8%	8%	8.8%

As part of the NHSGGC Sexual Health Information and Communication Strategy a project manager for digital communication has been appointed to enable all NHS GGC sexual health digital media to be updated and fit for purpose for the target audience. As part of this project the Free Condoms website will be updated to be mobile friendly, and other forms of social media considered to work alongside it.

#### **Quality Improvement Actions 2015**

##### **Digital Media**

- ❖ Upgrade current free condoms website
- ❖ Work with priority groups to consider if and what social media is appropriate

## 8. Communication

Information for potential service users is primarily delivered via the CDS web-site ([www.freecondomsglasgowandclyde.org](http://www.freecondomsglasgowandclyde.org)). Service users and venue staff can contact the staff team with any enquiries via the Free Condoms e-mail ([freecondoms@ggc.scot.nhs.uk](mailto:freecondoms@ggc.scot.nhs.uk)). A telephone enquiry line is also available but this is rarely used. Staff telephone numbers appear on the web-site (under the professionals section) but are rarely used by the public.

Table 15 below illustrates the variety of e-mail enquiries received by the public during 2014. Service users have the option of requesting 'choice cards' via e-mail to be sent to their home address. This has proved popular with 214 choice card requests received over the course of the year making this the most common reason for contacting the team.

Table 15. All Public Enquiries

Contact Nature	Total
Request Choice Cards	214
Request Postal Service	7
General Enquiry	8
Sexual Health Enquiry	1
Free Marketing & Promotion	4
<b>Grand Total</b>	<b>234</b>

### **Quality Improvement Actions 2015**

#### **Service Users**

- ❖ Undertake a service user feedback exercise (methodology to be decided).

## 9. Information and Training for Venues

There are three main formats for providing information to distribution venues; the service handbook, a 'professionals' section on the web-site and face-to-face staff training. Handbooks are given to each new venue as part of their 'welcome pack' together with choice cards, posters and a 'frequently asked questions' style guide to products and ordering procedures. Training is offered to all new distribution venues. As recruitment was limited during 2014 due to the free condoms mapping exercise to identify current provision and analyse gaps in service, the number of sessions provided is contextually appropriate. A breakdown of sessions during 2014 is provided in Table 16.

Table 16. Breakdown of information and training for venues by CHP/Sector

CHP AREA	Information Session	Training Session	Venue Development	TOTAL
GCC NE	1	2		3
GCC NW		6		6
GCC S	1	4		5
INVER	1	1		2
MIXED		1	1	2
REN			1	1
<b>TOTAL</b>	<b>3</b>	<b>14</b>	<b>2</b>	<b>19</b>

### Quality Improvement Actions 2015

#### Information and training

- ❖ Review Distributer Form to record levels of training,
- ❖ Review training provision to venues, targeting young people and under 16's
- ❖ Refresh CHP Health Improvement support network for Free Condoms Service
- ❖ Review distributer handbook

#### 9.1. Service Handbook

The Service Handbook was created prior to the service launch in June 2011 and was updated during the second quarters of 2012 and 2013. Version 3 of the Service Handbook has been distributed to all new distribution venues from May 2013 onwards and a revised version also appears on the web-site. The handbook includes information on a range of topics including service procedures and operation (including expected service standards), information on products, providing guidance on condom use and an in-depth section on providing condoms to young people under the age of 16.

## **10. Commonwealth Games 2014**

The Commonwealth Games took place in Glasgow from 23<sup>rd</sup> July – 3<sup>rd</sup> August 2014. Free Condoms contributed in the preparation for the games, and it was an opportunity to work with other agencies involved in the Commonwealth Games. Free Condoms liaised with Sexual Health Services and Commonwealth Games organisers to provide 85,032 free condoms for athletes, volunteers and staff. Processes included the cost for the condoms being reimbursed by Scottish Government. Condoms were delivered via our contracted supplier Pasante to a single delivery point for use in polyclinics. Condoms were delivered in 'Eco Packs' (288 condoms per pack) due to the order volume.

To prepare for the Commonwealth Games we informed the public via the Free Condoms Website <http://freecondomsglasgowandclyde.org> that traffic to venues may be affected and provided the link [www.getreadyglasgow.com](http://www.getreadyglasgow.com) for members of the public to check.

We also sent a newsletter out (Issue Number 10) summer 2014, which was also available on the Free Condoms Website, requesting venues to consider their current stocks against potential increase in customers. There was an increase in ordering during this time, although there were other factors that may have contributed e.g. seasonal ordering patterns.

## **11. Marketing and Target Populations**

### **11.1 Further and Higher Education – Young People 16-24**

Condom venues are also available within colleges and universities. We currently have 19 venues throughout NHSGGC, and support fresher's events at the beginning of academic years. This includes training of any new students who volunteer to be involved in the distribution from their campus. Fresher's events also provide an opportunity to promote and sign-post the service. We endeavour to provide some promotional items such as sperm key rings. Free Condoms staff do not usually provide direct input to fresher's events, although work closely with student volunteers including offering training on the service and use of condoms.

In addition to supporting students in their fresher's events, Free Condoms were part of Scotcampus Fresher's Festival in the SECC on 2<sup>nd</sup> and 3<sup>rd</sup> of October 2014. This was a different approach as Sexual Health Free Health Improvement Team/Free Condoms do not usually undertake public facing work. A lot of preparation and organisation went into making this a successful event, and it included having a stall on the two days. The event was promoted via Scotcampus social media accounts, including a link to the Free Condoms website, magazine articles and advertising within the Scotcampus publications (5 issues). The NHSGGC Twitter account was also utilised with tweets promoting the event and the Free Condoms Website over a two week period.

The Fresher's event enabled direct promotion of the service to a target population of 16 – 24 year olds by engaging directly with members of the public. It also provided an opportunity for Partnership work. The community engagement team from Sandyford were in attendance on Day 1 to promote Sandyford services. The African Health Project was also involved by the attendance of one of their Community Outreach & Development Coordinator's. Employees and employers represented at the event also wanted to know about the service, including the provision of condoms for staff. Volunteers from the NHSGGC Volunteer Programme were also in attendance to offer support, which was really helpful.

Over two days 10,000 condoms and a large quantity of lubricant were given out. Choice cards were promoted and used, condom demonstrations took place, and lots of valuable interaction with all who attended the day. There wasn't a huge increase in the web traffic as a result, but it may have contributed to the general increase October – December.

## 11.2 African Health Project

In 2015 Free Condoms will support/fund a pool tournament and football tournament. This provides an opportunity for African Men to come together to participate in a sporting event with key messages on HIV and its prevention, including condoms. Further detail is provided in Table 17 to provide context to promotions and marketing to target populations.

Table 17. Outline of marketing support resources and marketing to target populations

<b>Item</b>	<b>Description</b>	<b>Target Group</b>	<b>Partner/ Provider</b>
Product Colour Key	FCDS including mail shot all venues	All	Medical Illustration
Mail shot	Contact details, product choice sheet, handbook e-link	All	In-House
Pride Publication	Full page advert	LGBT	Pride
Fresher's Events	Provide Additional Stock to venues & support to colleges/universities	Students	In-House

Bus station advertising	Advertising Seasonal Campaign – 10 adverts bus stands Buchanan St	All	Primesight
West Dun Nightzone Initiative	Provide choice cards/information for young people in safe zone areas	All	Free Condoms Service

## **12. Enquiries from other Boards & Condom Distribution Network**

During 2014/15 there were 3 requests received by the Free Condoms Service on its model of provision, with each asking different types of questions and the evidence base for the model of implementation. These were from :

- University of Sheffield
- Wirral (Public Health)
- East Sussex

These were responded to including the provision of the following documentation:

- A summary of the previous C-Card scheme c2009
- The recommendations from the C-Card review in 2010
- Condom Distribution Scheme annual report 2011 and 2013

The Condom Distribution Network (CDS Network) also met with representation from condom distribution services across Scotland. It was agreed that the network would meet twice yearly to share knowledge, information, research, and good practice. It is intended to use this model within NHS GGC by bringing together health improvement practitioners who currently support Free Condoms on a regular basis.

### 13. Free Condoms Quality Improvement Action Points for 2015 – Summary

#### **Quality Improvement Actions 2015**

##### **Aims & Objectives**

- ❖ Review and where appropriate revise aims and objectives of Free Condoms Service.

#### **Quality Improvement Actions 2015**

##### **Improve Ordering**

Contact low ordering venues in SIMD 1 & SIMD 2 areas to refresh engagement with condom distribution service, including addiction services and prisons.

#### **Quality Improvement Actions 2015**

##### **Data Collection and Reporting Mechanisms**

- ❖ Add fields for Intermediate Zones and SIMD Quintiles to condom distribution database for improved governance and reporting. This will allow the condom distribution database to be interrogated to provide information requests to include SIMD Quintiles matched to condom venue postcode.
- ❖ Database cleansing including review of definitions for access by clients.

#### **Quality Improvement Actions 2015**

##### **Venue Recruitment**

- ❖ Recruit venues in priority areas identified by mapping exercise to reduce inequalities, prevent HIV, STI's and unintended pregnancy.

#### **Quality Improvement Actions 2015**

##### **Information and Training**

- ❖ Review Distributer Form to record levels of training,
- ❖ Review training provision to venues, targeting young people and under 16's.
- ❖ Refresh CHP Health Improvement support network for Free Condoms Service
- ❖ Review distributer handbook.

### **Quality Improvement Actions 2015**

#### **Service Users**

- ❖ Undertake a service user feedback exercise (methodology to be decided).

### **Quality Improvement Actions 2015**

#### **Digital Media**

- ❖ Upgrade current free condoms website.
- ❖ Work with priority groups to consider if and what social media is appropriate.

### **Quality Improvement Actions 2015**

#### **Equalities**

Free Condoms has not had an EQIA (Equalities Impact Assessment). This will be undertaken during 2015 in order to meet the following NHSGGC drivers:

- ❖ NHSGGC Equality Scheme 2013-2017
- ❖ Equality Act (specific duties)
- ❖ Organisational Performance Review (OPR)
- ❖ Efficiency Redesigns

**Appendix 1 - Condom Distribution Scheme, Aims and Objectives, March 2013**

Condom Distribution Scheme

Aims and Objectives

Revised  
March 2013

Sarah Graham, CDS Manager

Nicky Coia, Principal Health Improvement Officer – Sexual Health

Louise Carroll, Programme Manager – HIV and STIs

**Overarching aim: To provide free condoms across NHS Greater Glasgow and Clyde to people who need them.**

	<b>Aim</b>	<b>Objectives</b>	<b>Mechanisms</b>
1.	To identify appropriate target groups based on identified need.	<ul style="list-style-type: none"> <li>• Routine review of national and local epidemiology on HIV, STIs (preventable through barrier methods) and unintended pregnancy.</li> <li>• Routine review of relevant needs assessment, research and evaluations regarding preventable ill health, sexual behaviour and service delivery models.</li> <li>• Through networking, be aware of and critically appraise current policy, practice and professional opinion.</li> </ul>	<ul style="list-style-type: none"> <li>• Accurate description of target groups and their needs including, age, ethnicity, sexual behaviour, morbidity and HIV status.</li> <li>• Understanding of risk behaviours (as part of Health Improvement Team – Sexual Health).</li> </ul>
2.	Monitor and review performance of delivery of the service in order to create and maintain effective partnerships which enable service development and delivery.	<ul style="list-style-type: none"> <li>• Identify relevant strategic partners at a national, regional and local level.</li> <li>• Networking with key stakeholders.</li> <li>• Regular, routine communication with a range of stakeholder, services and partners.</li> <li>• Review delivery of service to ensure geographic coverage, variety of service types and availability to target groups.</li> <li>• Recruitment of agencies to deliver CDS.</li> <li>• Maintain partnerships via routine and regular communication.</li> </ul>	<ul style="list-style-type: none"> <li>• Attending at relevant meetings and groups.</li> <li>• Consultation with service providers and service users.</li> <li>• Communication bulletins.</li> <li>• Annual mapping of CDS delivery points to review consistent target group and geographic coverage.</li> <li>• Quarterly and Annual Reports.</li> <li>• Minutes and actions from bi-annual condom review management group.</li> </ul>
3.	To provide an available and accessible quality service.	<ul style="list-style-type: none"> <li>• Provide tailored training, information and training materials to distributions points.</li> <li>• Information and signage within distribution points.</li> <li>• Mechanism to accurately track and monitor project spend.</li> <li>• Monitoring of any associated contracts including marketing and supply.</li> <li>• Simple and coherent ordering distribution mechanisms.</li> <li>• Implement support systems for all involved in ordering and</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure venues have signage and use appropriately.</li> <li>• Quarterly Report to stakeholders including financial information.</li> <li>• Annual Finance Report to stakeholders.</li> <li>• Monitoring system for complaints and critically review on a quarterly basis.</li> </ul>

		<p>supply system.</p> <ul style="list-style-type: none"> <li>• Evaluation of delivery.</li> <li>• Awareness of models of innovative practice.</li> <li>• Create a robust complaints procedure.</li> <li>• Review of products to ensure value for money and acceptability to service users.</li> </ul>	
4.	To establish and maintain effective communication with current and future service users.	<ul style="list-style-type: none"> <li>• Develop and Implement an effective marketing strategy.</li> <li>• Monitor feedback from service users and non-service users.</li> <li>• Rolling programme of evaluation.</li> </ul>	<ul style="list-style-type: none"> <li>• Reports and data from feedback and evaluations.</li> <li>• Web analysis.</li> <li>• E-mail log.</li> <li>• Choice card requests.</li> </ul>
5.	To provide a responsive service that addresses the needs of service users.	<ul style="list-style-type: none"> <li>• Use client feedback (both service providers and service users) to ensure an optimal service model.</li> <li>• Ensure that services have adequate information to signpost to other services.</li> <li>• Ensure that the needs of young people are addressed in line with local protocols for working with sexually active young people and child protection policies and procedures.</li> <li>• Ensure service cogent with relevant equalities policies.</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure service handbook is reviewed annually and includes list of supporting services including Sandyford.</li> <li>• Ensure service providers can access relevant training.</li> </ul>
6.	To contribute towards the evidence base and inform future policy and services.	<ul style="list-style-type: none"> <li>• Participate in/read relevant research.</li> <li>• Annual report summarising monitoring and evaluative information</li> <li>• Participate in relevant research and other fora to raise the profile of CDS models as a sexual improvement intervention.</li> </ul>	<ul style="list-style-type: none"> <li>• Attendance at minimum of one conference per annum.</li> <li>• 1 research output per year (conference paper; academic journal; discussion paper etc).</li> </ul>
7.	To ensure service accountable and governed appropriately.	<ul style="list-style-type: none"> <li>• Capacity and resilience of team supported by co-location with Health Improvement Team – Sexual Health and appropriate structures.</li> <li>• Reporting into NHS GGC BBV and Sexual Health planning structures.</li> </ul>	<ul style="list-style-type: none"> <li>• Financial Reporting.</li> <li>• Quarterly and Annual Reports.</li> </ul>
